

Keep Learning Going All Summer Long!

Have you heard of the summer learning slide? Studies show that when students don't engage in learning activities over the summer months they could lose up to two months of math and reading skills. Don't send your kids back to school already behind—keep them engaged in fun learning experiences that will set them up for success the following school year.

This summer, we are using an online learning program called Edmentum Exact Path. This exciting digital tool personalizes learning across grades K–12 in reading and math. It starts by targeting each student's academic strengths and weaknesses with an adaptive assessment, and then it prescribes a tailored playlist of lessons, practice, and short quizzes at their learning level.

Where can my student find his or her work?

Your student will primarily work within his or her unique learning path, which is based on assessment results for each available subject. Within a learning path, no more than four skills will display at once. Each skill could consist of a lesson, practice, and a quiz.

How will the learning path change as my student keeps working?

After completing each set of skills displayed in the learning path, a short Progress Check will be unlocked. This will assess a student's understanding of the skills he or she just learned and determine if additional review is needed or if the student is ready to move ahead. If the student does not master a skill, he or she may receive a prerequisite skill known as a Building Block to help shore up foundational concepts.

Where can my student see his or her progress?

The Rewards area tracks all progress and skill mastery the student has made in Exact Path.

- **Mastery Trophies:** Students must earn 80 percent or above on each skill within the Progress Check in order to earn a Trophy for that skill.
